SUMMARY

Master's student in Computer Science at ASU (4.0 GPA) with industry experience in backend and cloud-based systems. Experienced in REST APIs, distributed systems, and full-stack development using .NET, Java, React, and AWS. Seeking a Summer 2026 Software Engineering Internship.

EDUCATION

Master of Science in Computer Science

Arizona State University

Aug 2025 – May 2027

4.0/4.0 GPA

Bachelor of Engineering in Computer Engineering

University of Mumbai

June 2018 – June 2022

8.58/10 CGPA

TECHNICAL SKILLS

Programming Languages: C#, Java, Python, JavaScript, TypeScript, SQL, C++, HTML5, CSS3

Technologies & Frameworks: .NET Core, ASP.NET MVC, ASP.NET Web API, React.js, Node.js, Express.js, Angular, Spring Boot, Hibernate, Flask, Pandas, NumPy

Databases: SQL Server, PostgreSQL, Oracle SQL, MongoDB, MySQL

Cloud & DevOps: Microsoft Azure, AWS, Docker, Kubernetes, CI/CD (GitLab, Jenkins), Apache Kafka

Developer Tools: Visual Studio, VS Code, Postman, JIRA, Git

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Distributed Systems

PROFESSIONAL EXPERIENCE

Software Developer | We3.Tech

Aug 2024 – July 2025

- Designed and developed scalable RESTful APIs using .NET Core, supporting 200+ franchise locations with role-based authentication, input validation, and structured logging.
- Improved backend performance by 35% through async processing, SQL query optimization, and in-memory caching.
- Built real-time C# data pipelines for financial analytics, improving processing accuracy by 25% and ensuring data consistency.
- Delivered full-stack features using React + .NET, integrating third-party APIs with secure token-based authentication.

Associate Software Developer | MUFG

July 2022 – Aug 2024

- Led backend API development for an enterprise Member Center platform serving 10,000+ users, implementing JWT-based authentication and Okta SSO integration with role-based access control.
- Increased automated unit test coverage using xUnit/NUnit and enforced static code analysis (SonarQube), reducing production defects by 30% and improving release stability.
- Optimized Azure DevOps CI/CD pipelines, reducing deployment time by 40% and improving rollback reliability.
- Built modular React components integrated with REST APIs, improving UI performance and reducing support tickets by 25%.

Full Stack Developer Intern | Taruna Infosoft

Jan 2021 – June 2022

- Built and deployed a full-stack e-commerce platform using React and Java-based REST APIs, processing 5,000+ secure transactions with Razorpay/PayPal integration.
- Optimized relational schemas and SQL queries to improve backend performance.
- Developed Python scripts to automate reporting and streamline workflows.
- Contributed to REST API design and service-layer architecture using object-oriented programming principles.
- Implemented role-based access control and server-side validation to enhance application security.

PROJECTS

Remote File Transmission System

Sept 2021 – Mar 2022

- Built a secure file sharing platform using .NET MVC and .NET Core with QR based access and OTP authentication.
- Implemented encrypted storage, role based access control, and REST APIs to ensure secure file transmission.
- Optimized backend logic and database queries to improve upload and download performance.

Real-Time Graph Data Processing Pipeline

Oct 2025 – Dec 2025

- Developed a real time data pipeline using Kafka, Docker, and Kubernetes to process high volume NYC taxi data.
- Designed Neo4j graph models and Python ETL workflows, applying PageRank and BFS for graph analytics.
- Deployed distributed services on Kubernetes to ensure scalability and fault tolerance.

PATENT

Intellectual Property Office, United Kingdom

July 2024

- Awarded UK design patent Design No. 6376787 for Smart Baby Swing for Optimal Infant Care, recognizing an innovative product design and technical concept.
